

Sharing RtI Data with Parents

RtI Process	Parent Involvement
<p>Universal screening data are collected and analyzed early in the school year.</p> <p>Diagnostics data matches intervention to area of need</p>	<p>If student scored below benchmark on screener and supporting assessments, explain plan for remediation.</p> <p>If student will be receiving Tier II intervention, explain the details of the intervention (who will provide it, how often, group size), the student's goal, and the progress monitoring plan. The targeted skill should be explained to the parents and suggestions for helping the student at home should be provided. When data has been collected the graph should be presented and explained to the parents</p>
<p>Student receives Tier II intervention</p>	<p>Graphed data should be shared with parents quarterly. Data may be shared with parents in a face-to-face conference or can be sent home. As needed, data may be shared on a more frequent basis</p>
<p>Student receives Tier III intervention</p>	<p>Parents will be invited to a Problem Solving Team meeting and encouraged to participate in the problem solving process during the Tier III intervention process. Graphed data will be shared with parents. Again, data can be shared with parents in a face-to-face conference or can be sent home.</p>

•All parent contact should be documented

Parents are important partners in the problem solving process.
